- Communication
- Problem solving
- Confidence
- Team spirit
- Creativity

SUMMARY

I am proficient in the C and C++ programming languages, as well as web development using JavaScript, HTML, and CSS. I use Git and GitHub for version control, ensuring effective collaboration and rigorous project tracking. Additionally, I have experience working with React and TailwindCSS for building modern, responsive web applications.

EDUCATION

Common core at 1337 School 2022-2024
1337 UM6P, Benguerir

- The leading computer science training program in Morocco, part of the 42 Network

Baccalaureate 2018 - 2019

EL ASALAM , Benguerir

- Physical Sciences

PROJET

Inception

Developed a system administration project using Docker to virtualize various images in a self-configured virtual machine.

Web Serve

I developed a web server from scratch in C++, mastering network concepts and HTTP protocols while optimizing performance and connection management.

Ft_Trancendance

Developed ft_transcendence, a dynamic web application for a ping-pong game using pure JavaScript. The project features real-time gameplay and smooth animations.
